### Film Analyst Revolutionizes the Way We Watch Movies

**Chicago, IL**—It's often been said that "Life is what you make of it." And now there's a book that illustrates the wisdom of that time-honored adage from a unique perspective, driving it home with an enlightening—and entertaining—approach.

In the rereleased award-winning second edition of his seminal work, *Get the Picture?!: Conscious Creation Goes to the Movies* (ISBN 978-1505570168, 2014, originally published in 2007, with details at <http://booklaunch.io/brent%20marchant/get-the-picture>), author and film analyst Brent Marchant shows how what we experience is a product of what we believe. By outlining the principles of "conscious creation" philosophy (also known as "the law of attraction") and illustrating them with examples from the world of film, Marchant provides a cinematic road map to understanding how the world around us arises from our personal worlds within.

In addition to shedding light on how we view our world and how it materializes, conscious creation teaches us about valuable personal empowerment practices. At its core, the philosophy

maintains that we “consciously,” rather than randomly, create our reality through our beliefs and intents. But being aware of those beliefs and intents is the key. Marchant says, “People often believe that most of what occurs in their lives *happens to them*. They’re quick to put the blame on fate or luck when something unpleasant occurs. But that can all be turned around. By employing the concepts of conscious creation and the law of attraction, we can change our worldview—and ourselves—for the better.”

One might ask what any of this has to do with movies. “Movies are much more significant than we give them credit for,” Marchant says. “From a conscious creation standpoint, movies often show us the principles of this philosophy at work. They can also serve as personal mirrors. When we witness a character’s triumphs (or mistakes) on screen and how they either learn (or don’t learn) from them, we have an opportunity to learn about *ourselves*. We can analyze how the character’s thoughts and actions influence the world they live in, and that, in turn, can provide us with insight into how our own worldviews create the world around us.”

In each of *Get the Picture?!*’s 11 chapters, Marchant introduces a particular conscious creation concept and then presents five movies that illustrate the concept in question. Drawing from a broad range of film genres, the author examines how their various story lines and characters can help us all become adept conscious creators.

For its efforts, the book has been recognized as an award winner. In 2016, *Get the Picture?!* took top honors in the National Indie Excellence Awards competition, named the winner in the New Age Nonfiction category. The book also received praise in a judges’ commentary from the 2016 *Writer’s Digest* awards competition, astutely comparing it to “a college course in cinema – but without the high price tag.”

*Get the Picture?!* is available in print and ebook formats from major online booksellers, including Amazon, Barnes & Noble, the iTunes Store and Kobo Books, among others. Marchant routinely conducts radio interviews to discuss the book, and updates about this title can be found on dedicated social media pages on Facebook, MeWe, Pinterest and Google+. ## FOR IMMEDIATE RELEASE

### **“Get the Picture?!” Receives Widespread Support and Endorsement**

**Chicago, IL**—Author and film analyst Brent Marchant is pleased to announce that the award-winning second edition of his seminal work, *Get the Picture?!: Conscious Creation Goes to the Movies* (ISBN 978-1505570168, 2014, <http://booklaunch.io/brent%20marchant/get-the-picture>), has received widespread support and endorsement from a variety of luminaries in the film and metaphysics/new age communities, as well as from many fellow authors. The updated second edition, originally published in 2007, is available in print and ebook formats from all major online retailers, including Amazon, Barnes & Noble, the iTunes Store and Kobo Books.

Marchant’s book examines how the principles of “conscious creation” (also known as “the law of attraction”) are illustrated through film. *Get the Picture?!* thus provides readers with an enlightening—and entertaining—way to learn how this empowering approach to life works. And now others in the know about these subjects have offered their takes on how Marchant’s book effectively addresses these subjects.

Here is what others have to say:

"I love movies, and I love the study and practice of metaphysics. I'm always looking for clues and keys through the common story lines we share on how to better understand the complex world in which we live. Brent Marchant's book, *Get the Picture?!*, dynamically marries movies and metaphysics to serve us with a delightfully engaging, perspective-altering guide to dimensions of understanding to which we may otherwise remain blind.

"Brent is an amazingly gifted author with an ability to transmit complex metaphysical concepts in a light-hearted real life dialogue. His tireless enthusiasm for cinema and conscious creation shines through in this intelligent narrative of personal experience and observation. His ability to direct his reader into new perspectives encourages the reader to witness his own life choices with new awareness, ultimately allowing a greater potential for healing and change.

"There is an ever-growing awareness spreading throughout our Universe and humanity of conscious evolution, one in which we are searching out ways to accept and activate a greater responsibility as co-creators in our world vision and, indeed, in our own personal lives. *Get the Picture?!* powerfully and beautifully guides the reader as conscious creator step by step toward a better understanding of his power and role in creating the life of his choosing."

“*Get the Picture?!: Conscious Creation Goes to the Movies* by Brent Marchant is a superb book that amazingly combines two disparate topics: movies and metaphysics, for an excellent read. This book will especially appeal to students of metaphysics, and will enlighten and entertain movie aficionados as well.

“Interesting that the title uses an interrobang sentence. I’m sure that will get attention! The cover is well done. I like the colors, and the eye in the lens. Very creative. The back cover copy is well done and tells what the reader can expect. The author photo is nice, and the information on the author is wonderful. I like how the author gives his readers several ways to contact him on the Internet. In this age when readers want to stay in touch with their favorite authors, this is a great marketing tool.

“The author chooses excellent movies that are well known to ardent movie lovers. Those who keep up with movies and want to explore their deeper meaning will love this book. Reading this book is akin to taking a college course in cinema – but without the high price tag. Believe me, I know. I took two courses in cinema in college – one in European film and the other in American film. I never looked at films the same way again – and neither will the readers of *Get the Picture?! Nice work.*”
